PROFILE

I am a Computer Engineering student with a strong foundation in full-stack web development, specializing in backend technologies. I have hands-on experience with the .NET ecosystem (C#, ASP.NET Core Razor Pages, MVC, Blazor) as well as Java and Spring Boot (Spring MVC, Thymeleaf). I also have skills in working with SQL databases (SQL Server, Oracle, MySQL, PostgreSQL) and front-end technologies like HTML, CSS, JavaScript and React. I can use Git for version control and collaboration. I enjoy solving problems and learning new technologies. I am responsible, detail-oriented, and work well both independently and in a team. I always try to improve my skills and write clean, efficient code by working on different projects.
